-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/21/08 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2, 4-13, 15-24, and 29-42 are rejected under 35 U.S.C. 102(e) as being anticipated by Yokoi et al (US 2003/0181788 –also JP2002-084387).

Yokoi et al discloses illumination device 23 and observation unit 24 in a capsule-type in vivo medical imaging device (see Abstract). The observation device 24 is configured of an object optical system 31 for acquiring optical images, an imaging

sensor 32 such as a CMOS or the like for imaging the optical images acquired by the object optical system 31, and the imaging driving circuit 33 for driving the imaging sensor 32 [0076]. The image sensor is positioned to acquire images through a window 41 [0083]. Magnet 36 of Figure 8B functions as a ballast and is located off the longitudinal axis of symmetry 38, so that the device has a center of gravity displaced from the longitudinal axis of symmetry [0134]. It is noted that since the claim uses the open-ended transition phrase "comprising," an applied reference may contain additional elements and even if other elements within the capsule served to counterbalance the capsule, the limitations of the claim would still be met because the claimed elements are structurally indistinguishable from Yokoi et al. Furthermore, the capsule may contain a second imager, in addition to a first imager that images in a direction parallel to an axial portion of the device, that images in a direction parallel to a transverse portion of the device (see Figure 23). It is noted that the imagers in Figure 23 each obtain images from the axial and transverse portions of the imager.

Response to Arguments

Applicant's arguments with respect to claims -12, 4-13, 15-24, and 29-42 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL ROZANSKI whose telephone number is (571)272-1648. The examiner can normally be reached on Monday - Friday, 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on 571-272-4956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
